- Design & Multimedia: Adobe Photoshop

RELEVANT PROJECTS & ACADEMIC EXPERIENCE

Hiring Management System with Intelligent Chatbot using Natural Language Processing

- Technologies Used: Frontend: React.js, Vite, Backend & Database: PHP, MySQL, Apache (XAMPP), RESTful APIs AI & Libraries: Google Gemini AI API, Composer, PDF Parser
- Built an AI chatbot supporting both English and Tagalog that answers applicant questions, checks real-time application status, and guides users through the hiring portal.
- Developed an automated resume parser that scans uploaded PDF resumes, extracts applicant details, and scores qualifications against job requirements to determine candidate eligibility.
- Implemented AI safety guardrails across both the chatbot and resume parser to block prompt tampering, reject unauthorized commands, and ensure fair candidate evaluations.
- Created an audit logging system for non-repudiation, recording admin actions with timestamps and IDs to maintain accountable, verifiable administrative records.
